

# Sewing Pattern #794561

Dress - Fitted - Maxi length - Creative dresses with set-in sleeves - A-line skirt with box pleats - Gathers, wraps and twists - Front reverse wrap and gathers at neckline - Back princess seam: neck to waist - Shirt sleeve with a folded opening

#### Note on seam allowances:

- If the pattern has double contour the seam allowances are included.

- If the pattern has single contour, the seam allowances are NOT included and need to be added when laying out the pattern.

## Note on length of fabric:

Attention! The amount of fabric needed for your pattern is not included. It will depend on the selected pattern size, the width, and design of the fabric you plan to use. You are welcome to use the Online Fabric Estimator to make calculations. Alternatively, print all the paper patterns and lay them out at the width of fabric you plan to use (usually from 90 to 150 cm). Measure how much fabric you will need. Don't forget to account for pieces that need to be cut multiple times and pieces that are cut on the fold.

# **PRINTING:**

Please use Adobe Reader software to open your PDF pattern. You can get Adobe Reader free of charge at this link - <u>https://get.adobe.com/reader/</u>.

Make sure you print your patterns at actual size (100%% scale or None) and on single sides of plain A4 paper. Verify that the print out size is to the correct scale by measuring the test square on the first page. The upper edge of the square features a centimeter scale, and the bottom edge features an inch scale.

Trim top and/or right margin of the pages where you see the scissors symbols. In the center of each page, the number of row and column is printed, separated by / sign. Construct layout pages according to these marks (for example, page marked 2/3 is in the second row and in the third column). Align pages using margins and tape or glue together.

# **CUTTING:**

#### Note on cutting:

Lay out your pieces according to straight of grain as marked on the pattern pieces.

Some pieces will be cut on the fold, the corresponding edge will then be marked with a fold mark. Kindly pay attention to notes regarding type of fabric and quantity of required pieces on a block. For example, [Main, Interfacing - cut 1+1] on a pattern piece means that you need to cut 1 piece as is and 1 mirrored piece from the main fabric as well as from interfacing.

Make sure to mark all notches and other design features such as pleats etc. from the pattern piece onto your fabric. When sewing the garment, pay attention to notches, they must match up.

\* The capital letters in brackets correspond to pattern blocks as seen in Online Fabric Estimator and in pattern blocks preview on the right.

## **INSTRUCTIONS:**

#### 1. Recommended fabric for your sewing pattern:

- Cotton (lightweight to medium-weight, no elastane)
- Linen (lightweight to medium-weight, no elastane)
- Rayon (lightweight, no elastane)
- Chambray (lightweight, no elastane)
- Cotton Lawn (lightweight, no elastane, note: may be transparent)
- Cotton Sateen (medium-weight, no elastane)
- Viscose (lightweight, no elastane)
- Polyester-Cotton Blend (lightweight to medium-weight, may contain elastane)
- Polyester-Rayon Blend (lightweight to medium-weight, may contain elastane)
- Polyester-Linen Blend (lightweight to medium-weight, may contain elastane)

#### 2. **Preparing the Fabric:**

#### a. Prewash the Fabric:

- $\circ$  Before starting your sewing project, it's essential to prewash the fabric to remove any sizing or shrinkage.
- Follow the fabric's care instructions for washing and drying.
- b. Dry and Iron:
  - $\circ$  After prewashing, dry the fabric according to the care instructions.
  - $\circ\,$  Once dry, iron the fabric to remove any wrinkles and ensure it's smooth and flat.

## c. Check Fabric Edges and Salvage Edge:

- $\circ$  Examine the edges of the fabric piece to ensure they are even and not cut in a slanted line.
- If the fabric is cut at an angle, take this into account when calculating the yardage needed.
- Do not include the salvage edge (the rough edge) into the calculations, as it may affect the look of the garment.
- d. Use the Online Yardage Tool at Sewist.com:
  - Visit Sewist.com and use the <u>online yardage tool</u> to estimate the amount of fabric required for your sewing pattern.
  - Input the necessary measurements and details to get an accurate yardage estimate.

#### e. Check Sewing Pattern Instructions:

• Review the sewing pattern instructions to determine the number of fabric pieces to cut and if any of them

need to be cut on the fold.

 Take note of any seam allowances on the edge of the fold line. If the seam allowance extends beyond the fold line, ignore it.

## f. Language Options:

- If you need the sewing pattern instructions in German, French, Spanish, Italian, or Russian, you can download them from the sewing pattern page at Sewist.com.
- $\circ$  Simply go to the gallery, type in the design number, and proceed to the sewing pattern page.

## g. Choose Your Cutting Method:

- 1. (Option 1)
  - Print out the sewing pattern and tape the pages together to create the pattern pieces.
  - Place the sewing pattern pieces on the fabric and use weights to keep them from shifting.
  - Consider marking the outlines with a water-soluble or heat-erasable marker, transferring all marks and notches, and paying attention to the width of the seam allowances.

## 2. (Option 2)

- If you have an iPhone, you can use the augmented reality sewing pattern with the VectAR app.
- Download the app and print out the marker page, then follow the manual at <u>Sewist.com VectAR</u> <u>Manual</u> to use the AR sewing pattern.

3. Apply fusible interfacing according to the Cutting instructions. Lay out your main fabric on the ironing board with the wrong side of the fabric up. Place the interfacing on top with the adhesive facing down. Place a pressing cloth over the top. Apply fusible interfacing in stages, covering a certain area at a time. Hold the iron over the fabric for about 10 seconds. Keep the iron still so that the fabric layers don't move around. Lift the iron and proceed to the next area. Leave it to cool a little before moving onto the next stage.

## 4. GATHERS, WRAP AND PLEATS ON THE FRONT

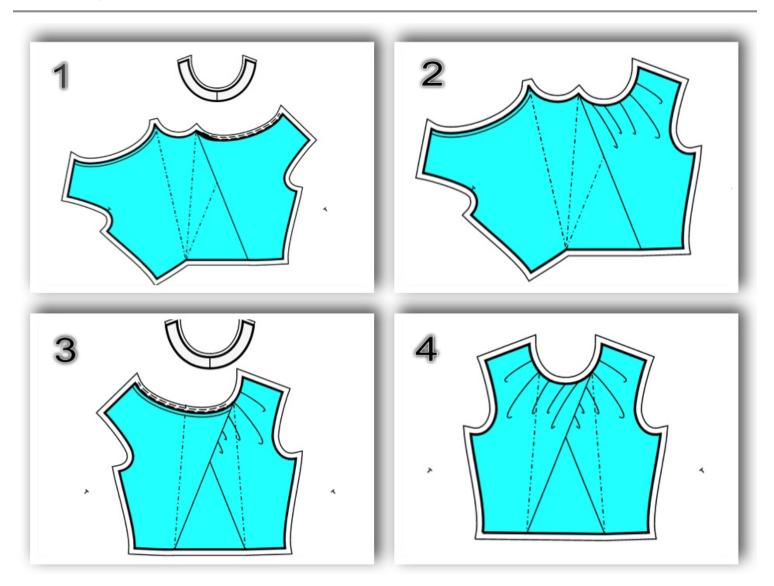

- Sew a gathering stitch along the neckline of the left Front between the fold line and the shoulder edge . Make the pleat on the left side of the Front, fold the bulk towards side seam. (See Figure 1)

- Gather fullness, using the Front Neckline Facing piece as a guidance. (See Figure 2). Baste the pleat outer fold, the pleat inner fold, and the neckline edge at the base of the fold, so that the layers of fabrics do not shift.

- Sew a gathering stitch along the neckline of the right Front between the fold line and the shoulder edge. Make the pleat on the right side of the Front, fold the bulk towards side seam. (See Figure 3)

- Gather fullness, using the Front Neckline Facing piece as a guidance. (See Figure 4). Baste the pleat outer fold, the pleat inner fold, and the neckline edge at the base of the fold, so that the layers of fabrics do not shift.

Sew

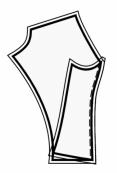

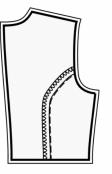

## 5. Attaching the Back Pieces

- 1. Match and Pin: Take the Back Side pieces and place them onto the Back Center piece, right sides together. Match the curved edges carefully. Use pins to secure them in place.
- 2. Sew the Seams: Starting from the top, where the curves meet, use your sewing machine to stitch down along the curved seam. Remove the pins as you sew and be sure to backstitch at the beginning and end for extra security.
- 3. Clip the Curves: After sewing, you'll notice that the curved seam has some excess fabric. To help it lay flat, make small, careful cuts into the seam allowance along the curve. But be cautious not to cut into the actual seam you just stitched.
- 4. Finish the Seams: To keep the fabric edges from fraying, finish the seams. This can be done with a serger if you have one, or you can use a zigzag stitch on your regular sewing machine. Press the seam allowances towards the center.
- 5. Press the Seams: To make everything neat and tidy, press the seam allowance towards the center of the Back piece. Pressing gives your sewing a polished look.
- 6. Treat as One Piece: Now that you've successfully joined the Back Side and Back Center pieces, consider them as a single Back piece for your future sewing steps.

## For example:

## 6. Assembling Box Pleats on Front Skirt:

- a. **Identify the Pleat Markings:** Look for the box pleat markings on the wrong side of your front skirt fabric piece. You should see five lines: two outer lines with single slanted dashes, indicating the visible folds, one center line, and two inner lines with double slanted dashes, indicating the inner folds.
- b. **Switch to the Right Side:** Turn the fabric over to the right side, keeping the pleat markings visible from the top. You will now be working on the right side of the fabric to create the pleat.
- c. **Fold the Fabric:** Fold the fabric along the two outer lines (single slanted dashes) towards the center line (center of the pleat). Ensure that the outer folds align perfectly with the center line, and the fabric edges are even.
- d. **Secure the Pleat:** Baste the pleat along the folds for 5-7 cm (approximately 2-3 inches) using a contrasting thread from the right side. This will help keep the pleat in place during the sewing process and prevent shifting.
- e. Stitch the Pleat: Using a straight stitch, sew along the top edge of the pleat, close to the outer edge of the seam allowance from the right side. Backstitch at the beginning and end for added durability. Ensuring the stitching is placed closer to the outer edge will keep it hidden when the piece is connected with another one in the future.
- f. **Press the Pleat:** Gently press the pleat with a steam iron from the right side to set it in place and create a crisp finish.

**Remove Basting:** Once the garment is fully assembled, carefully remove the basting stitches from the right side to release the pleat.

7. Make box pleats on Back Skirts according to markings and baste them 5-7 cm down from the waistline.

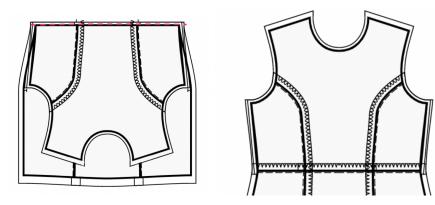

## 8. Assembling Front Bodice and Front Skirt:

- a. Place the Front Bodice and Front Skirt pieces together with *right sides facing* each other. Match the side seams and pin them in place.
- b. Align the center front lines of both pieces and pin them together. Ensure the darts and notches line up correctly.
- c. For precise alignment and to prevent fabric shifting, consider *basting* the seam before stitching. Use a contrasting thread to make the basting stitches easily visible.
- d. *Stitch* the pieces together along the pinned seam, using a straight stitch. *Backstitch* at the beginning and end for added durability.

- e. Serge the seam allowances to finish the edges neatly.
- f. *Press* the seam allowances towards the top to flatten and set the seam.
- g. Treat the assembled Front Bodice and Front Skirt as one Front piece for further construction.

Kindly note that the example below may showcase a slightly different pattern design, but the overall concept remains the same.

9. Place the right Back Bodice and right Back Skirt together with right sides together, matching the side seams. Pin the bodice to the skirt, matching the darts/notches. Consider basting the seam first to be sure the seams match up perfectly and to prevent any shifting of fabric when stitching. Stitch together. Serge the seam allowances, and press them towards top. Repeat for the left Back Bodice and Left Back Skirt. Treat as whole Back pieces in the future.

#### 10. NECKLINE FACING

- Sew shoulder seams of neckline facings. Press seam apart and serge.

- Serge outer edge of facings.

- Pin facing onto Shell right sides together, adjusting neckline edges. Fold the facing away all the way along EXCEPT for the area 5 mm from the edge of dress zipper (or center back edge if the back has an opening) and pin it to upper edge of garment. Fold seam allowances along zipper ((or center back edge) onto right side and pin to neckline on top of facings.

- Sew the neckline. Clip into curves, trim the corners, turn pieces right side out and press.

- Slipstitch facing to seam allowances of shoulder seam on Shell. Slipstitch facing to zipper tape, or the seam allowances along the center back edge, in case the back has an opening at the top.

11. Slash slit on sleeve along the marked line. Stop at 1 cm from the end. (Figure 1)

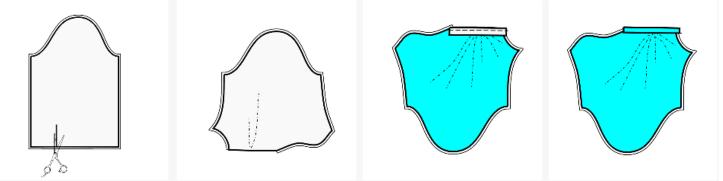

Cut bias tape from main fabric (or take ready), its width should equal 4 cm and length should equal two lengths of slit + 4 cm. You may also use a ready bias tape.

Spread the slit so that it forms a straight line. (Figure 2) Sew bias tape to slit of sleeve:

- Pin bias tape to the slit edge from the right side. The longer edge of the bias tape matches the edge of the slit. Baste the bias tape in place.

- Sew at 5-7 mm from the edge up to the slit corner. Stop the sewing machine, leave the needle in fabric. Raise the foot, straighten the slit, lower the foot, and then continue sewing. (Figure 3)

- Fold the bias tape towards edge and press. (Figure 4)

- Trim the seam allowance of the sit to 3-5 mm. Trim the bias tape to 1-1.2 cm. These recommendations are valid for natural/mixed woven thin and well draping fabrics, suitable for blouses.

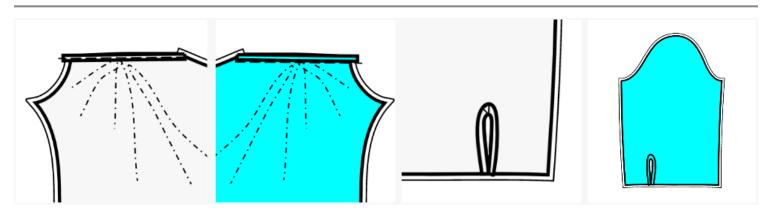

- Fold bias tape onto the wrong side. Fold under the inner edge, and baste. (Figure 5)

- Stitch in the ditch from the right side, into the first seam of the bias tape, connecting the inner side of the bias tape to the fabric. The ready trimming is approximately 4 mm wide.(Figure 6)

- Match the sides of the slit, and fold the sleeve right sides together along the slit line.
- Sew the corner of the trimming by a slanted stitch, like a small dart.
- On the wrong side, press the corner of the 'dart' towards one side and slipstitch it in place. (Figure 7)

- The ready slit is shown in Figure 8.

12. Serge the straight area along the lower edge of the sleeve, between the dashed lines. Turn under, press and topstitch or slip stitch as desired. Make and baste the pleats according to the dashed lines and to the technical drawing. Slipstitch 3-4 cm along the inner fold at the sleeve cap.

## 13. Garment Assembly

- 1. Aligning Right Sides and Pinning: Carefully place the Back piece onto the Front piece, right sides together. Take your time to align the following elements for a proper fit: the armholes, the lower edge of the sleeve, the waist seam, and the hem of the garment. Once aligned, use pins to secure them in place. Pins will help keep everything in order.
- 2. Side Seam Stitching: Commence stitching from the armhole corner, sewing a straight line down to the hem of the garment. This seam forms the side of your dress. Proceed deliberately, removing pins as you sew. Remember to begin and end your seam with a few backstitches to secure it.
- 3. Sleeve Seam Sewing: Transition to the sleeve section. Stitch a straight line from the armhole down to the lower edge of the sleeve. This creates the sleeve seam. Once again, take your time and remove pins as you progress. Ensure that you commence and conclude your seam with backstitches.
- 4. Seam Finishing and Pressing: After completing the stitching, it's important to finish the raw edges of the fabric to prevent fraying. You can accomplish this using a serger or by employing a zigzag stitch on your sewing machine. Subsequently, press the seams towards the back of the garment or the back part of the sleeve.

#### 14. Attaching Cuffs to Sleeves

- 1. Fold the Cuff in Half: Take the cuff and fold it in half lengthwise, right sides together. Pin or use clips to hold the fabric together.
- 2. Sew the Short Sides: Sew the short sides of the cuff together, starting right at the line where the cuff and sleeve meet. Remember to backstitch at the beginning and end to secure the seam.
- 3. Turn the Cuff Right Side Out: Trim away the corners of the seam allowances at about 1 mm from the seam, so that when you turn the cuff right side out, there are no bulky untidy corners. Gently turn the cuff right side out, pushing out the corners to make them neat. Press the cuff with an iron to flatten it.
- 4. Attach the Cuff to the Sleeve: Place the outer side of the cuff onto the lower edge of the sleeve, matching the edges carefully. You can either pin or baste the cuff to the sleeve to hold it securely in place. Then, sew the cuff to the sleeve with a straight stitch.
- 5. Fold and Stitch the Inner Side: Fold the inner side of the cuff towards the inside of the sleeve to enclose the raw edges. The fold should cover the seam by 1-2 mm. It is advisable to baste this area so that the layers of fabric don't shift when you stitch. From the right side of the cuff, stitch along the seam between the cuff and

the sleeve to secure the folded edge in place.

6. Create Buttonholes and Attach Buttons: Make buttonholes and sew buttons on the opposite side of the cuff, aligning them with the buttonholes.

# **TECHNICAL DRAWING:**
